

Northern NSW September 15-18, 2026

Leading discussion will be ICAN senior consultants Mark Congreve and John Cameron. Summer grasses often drive decision making in the fallow and summer crops. The GRDC NGN project 'Control strategies for key problem weeds in northern NSW' has been developing and evaluating management advice for these widespread problems. This workshop discussion session compiles latest research into field-ready management advice for growers and agronomists.

Topics include

- Understanding the biology and ecology that drive these problem species
- Integrating multiple tactics into a cohesive strategy, including pre-and post-emergent herbicides and camera sprayers
- Optimising the performance of different herbicides and tank mixes
- Implementing strategies in fallow and summer crops
- Unmet research needs that growers and advisers would like to see addressed.

Dates and locations

- **Quirindi** - Tuesday 15 September
Club Quirindi, 86 Station St, Quirindi NSW 2343
- **Bellata** - Wednesday 16 September 2026
Bellata Golf Club, 80 Berrigal Creek Road, Bellata, NSW 2397
- **Mungindi** - Thursday 17 September 2026
Mungindi Golf Club, 1 Boomi Rd, Mungindi NSW 2406
- **Croppa Creek** - Friday 18 September 2026
Croppa Creek Bowling Club, 26 Aspley Drive, Croppa Creek NSW 2411

These GRDC supported workshops are free to attend but places are limited. Workshops start at 8:30 AM and run until 2:30 PM. Morning tea and lunch are provided.
